What is Trading System ?

A trading system is a **set of rules that formulate buy and sell signals without any ambiguity or any subjective elements**. These signals are mostly generated by technical indicators or combinations of technical indicators.

Trading platforms **allow traders and investors to order trades, either buying or selling, with a stock broker**. The stock broker conducts the trade for the client, by trading on the stock market. Stock brokers offer their services at a fee, usually commission costs that allow them to make money.

What is Forex Trading ?

Forex trading is **the process of speculating on currency prices to potentially make a profit**. Currencies are traded in pairs, so by exchanging one currency for another, a trader is speculating on whether one currency will rise or fall in value against the other.

Is forex good for beginners?

Forex trading can be complex and may not be suitable for everyone.

Whether forex is good for you will depend on your financial condition, your goals, and how much investing experience you already have as a beginner. Overall, **beginners must exercise caution, especially as the majority of forex traders lose money**

What is P2P trading?

Peer-to-peer (P2P) trading refers to decentralized exchange markets that allow users to buy and sell Cryptocurrencies directly with one another. The trading method differs from centralized exchanges because it is less vulnerable, and no middle agent controls your funds during a trade
